Pediatric hospital bed

Patient

- Bed ergonomics adjusted to child patients
- Maximum safety

Staff

- Fully electrically adjustable bed
- Stability and easy to clean bed thanks to the column construction

Management

- Variable application for various child age categories
- Colour design suitable for pediatric departments

Eleganza Smart Junior

The Eleganza Smart Junior bed was developed for pediatric patients aged 4–15, the bed dimensions are adapted to the ergonomics of a child's body. The Eleganza Smart Junior is fully electrically adjustable bed.

COMFORT FOR ALL

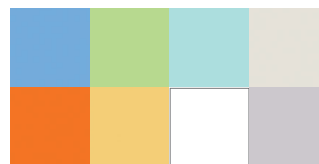

The bed's height can be electrically adjusted and thanks to the four-section mattress platform adjusted to various positions. The modern column construction provides the bed with exceptional stability.

- Setting of a comfortable position for the child.
- The autoregression of the backrest further increases the space in the pelvic area by 11 cm and therefore also the patient's comfort.
- The fully electric controls remove the physical strain on staff.

DESIGNED FOR CHILDREN

Modern and pleasant design, including the colour scheme has a positive effect on small patients and their parents.

MAXIMUM SAFETY

The siderails have smaller gaps between the rails in comparison with standard beds and do not create gaps at the bed's head-end. It is also possible to add a plastic protector to the siderails to maximise patient protection. The single $\frac{3}{4}$ siderails can be easily lowered at the sides of the bed.

- Unique GO safety concept prevents accidental bed positioning. The controls are activated for a period of 3 minutes with the aid of the GO button.
- The backrest is equipped with CPR unblocking for immediate resuscitation.

EASY CONTROL AND MAINTENANCE

The Supervisor panel for nurses can lock the bed's functions and is equipped with pre-programmed functions.

The patient and nurse hand control can adjust the position of bed's mattress platform and height.

Smooth columns, jointless technology and practical construction make the bed easy to clean.

Technical parameters

External dimensions	189.7×92.1 cm
Mattress platform dimensions	80×170 cm
Mattress platform height	38.5–76 cm
Backrest tilt	70°
Thighrest tilt	45°
Autoregression of backrest	11 cm
TR/ATR tilt	±16°
Safe working load	180 kg
Weight (depending on equipment)	120 kg
